

Andres Santiago Diez Tuberquia

Bogotá, Colombia – Available for Immediate Relocation & Hybrid / Remote Work

andresdieztuberquia@gmail.com | [\(+57\) 311 5267920](tel:+573115267920) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

(Hybrid & Remote Availability – Full-Time Commitment)

Results-driven **Full Stack Developer** with comprehensive experience engineering and maintaining end-to-end web applications in corporate and enterprise environments. Specialized in complete feature development (frontend and backend), RESTful API design and integration, and delivering highly functional, user-centric software solutions.

Demonstrated expertise building responsive interfaces with React and Next.js, combined with robust backend services in Python, Node.js, and C# (.NET). Strong background in database management (SQL), production support, log analysis, and system troubleshooting. Focused on delivering reliable, scalable, and maintainable software aligned with operational business goals.

TECHNICAL SKILLS

Backend & OOP:	Python (FastAPI, Django), Node.js (Express), C#, .NET, PHP, Laravel, OOP Architecture
Frontend:	React, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
Databases & Formats:	PostgreSQL, MySQL, SQL Server, Entity Framework, Relational Modeling, XML, JSON
Cloud, DevOps & CI/CD:	Docker, Azure, Azure DevOps, DigitalOcean, Git, GitHub, CI/CD Pipelines, Linux CLI
Core Methodologies:	RESTful API Design, Multi-Tenant Architecture, SDLC, Production Support, Log Analysis, Prompt Engineering & AI-Assisted Development (ChatGPT, Copilot, Claude)

WORK EXPERIENCE

Full Stack Developer – GPS Control

May 2026 – Present | On-site (Bogotá, Colombia)

- Engineer, configure, and maintain enterprise software platforms, ensuring high availability and operational stability.
- Design, implement, and consume RESTful APIs for seamless integration between core internal services and external platforms.
- Implement conversational AI features and automated data analytics pipelines for enhanced business reporting.
- Build automated web scraping pipelines and third-party integrations, including Google Maps, Mapbox, and external telemetry APIs.
- Collaborate within cross-functional engineering teams utilizing Git and GitHub under Agile/Scrum methodologies.

Full Stack Developer – GroupCos

October 2025 – April 2026 | Remote

- Developed full-stack features (frontend + backend) for multi-user enterprise operational software.
- Engineered and connected RESTful APIs, facilitating reliable and secure cross-platform data exchange.
- Enhanced UX/UI workflows in internal management applications, improving daily operational efficiency.
- Diagnosed and resolved critical production issues, analyzed application error logs, and maintained deployed modules.
- Participated in sprint cycles, code reviews, and releases using Git and Azure DevOps.

FEATURED PROJECTS

Enterprise Management Platform (Plataforma de Gestión Empresarial) Python • Node.js • MySQL • Docker • Azure

- Developed core modules for sales tracking, account administration, and commercial operations.
- Engineered and consumed RESTful APIs for reliable data handling and transactional processing across enterprise systems.
- Provided Tier-2/Tier-3 production support, monitored application logs, and resolved critical operational incidents.
- Executed continuous feature enhancements and configuration updates according to stakeholder requirements.

Alto Vivo – Multi-Tenant Business Architecture Multi-Tenant Platform • Altovivo

Web platform engineered for centralized operational, commercial, and administrative management across diverse businesses.

- Architected a multi-tenant solution hosting and isolating multiple commercial organizations on a shared infrastructure.
- Developed modular systems for inventory tracking, sales processing, financial accounting, and automated executive reports.
- Implemented granular Role-Based Access Control (RBAC) and tenant-specific configuration settings.
- Managed feature provisioning and module activation mapped to subscription tiers and access levels.

AgroKaja – Agricultural B2B/B2C Marketplace Platform Full Stack Web Solution

Digital ecosystem designed to connect agricultural producers, regional farms, and wholesale buyers directly.

- Built complete marketplace workflows including catalog browsing, dynamic shopping carts, and order life-cycle tracking.
- Engineered role-tailored dashboards and permissions for producers, buyers, and platform administrators.
- Created dedicated back-office management interfaces for inventory, regional distribution, and billing operations.
- Integrated payment gateways, dispatch logistics tracking, and direct communication channels between users.

Innovation Platform (Plataforma de Innovación) Laravel • React • MySQL

- Implemented end-to-end features spanning relational database modeling to frontend interface components.
- Constructed secure token-based authentication, user role hierarchies, and session management.

EDUCATION

Technologist Degree in Software Analysis and Development (ADSO)

Completed: April 2026

SENA (Servicio Nacional de Aprendizaje) – Colombia

Comprehensive training in software engineering, database normalization, system design, object-oriented programming, and production deployment cycles.

CORE COMPETENCIES

- **Production Support:** Incident diagnosis and log analysis
- **Technical Troubleshooting:** Root-cause issue resolution
- **Agile Collaboration:** Scrum sprints, code reviews, and Git
- **Autonomous Learning:** Rapid adoption of tools & frameworks
- **Adaptability:** Seamless fit in on-site, hybrid, and remote teams

LANGUAGES

Spanish

Native proficiency (spoken and written)

English

CEFR B1

Professional working proficiency: technical documentation, requirements analysis, system logs, written communication, and technical dialogue.
